

Social media resources

These graphics and messages can be used to raise awareness about radon and recognize National Radon Action Month (January) on your social media platforms.

Message	Image
<p>It's National Radon Action Month! Radon is a tasteless, odorless, colorless gas that can build up in your home and cause serious health impacts, including lung cancer. The good news is that testing your home is easy! Order your FREE test kit today: https://states.aelabs.com/#/nh</p>	
<p>Levels of radon, a tasteless, odorless, colorless gas, can change after major renovations. If you recently remodeled, now's the time to test your home for radon! Order your FREE test kit today: https://states.aelabs.com/#/nh</p>	
<p>Staying warm indoors? Radon is, too. With doors and windows closed over the winter, radon levels can build up in your home. That means it's the perfect time to test! Order your FREE test kit and cozy up with peace of mind this winter. https://states.aelabs.com/#/nh</p>	
<p>Did you know radon levels can change over time? If it's been more than two years since you last tested your home for radon, it's time to check again! Order your FREE test kit and check radon testing off your to-do list. https://states.aelabs.com/#/nh</p>	

Newsletter message

Use this message in newsletters or other written communications to raise awareness about radon and recognize National Radon Action Month in January.

January is National Radon Action Month! Radon is a naturally occurring radioactive gas. It has no smell, color or taste. Radon can enter homes through cracks in the foundation, or for those with private wells, through water in sinks, washing machines, showers, and toilets. Indoor radon is the leading cause of lung cancer among non-smokers.

The only way to know if you have radon in your home is to test for it. If you have high levels of radon in your home, the good news is that you can fix it! Order your FREE test kit here:

<https://states.aelabs.com/#/nh>

Digital poster

Use this poster to recognize National Radon Action Month on digital displays in January.

Radon is the second-leading cause of lung cancer in the United States.

It is odorless and tasteless ... and it can be fixed!
